Dear Rahul Ji,

As an ordinary investor I started my investments in Life Insurance from 2018 by your guidance.

I never thought that a simple life insurance product can generate a secondary income which can be used for planning further investments.

I got to introduce to this unique and brilliant technique of income generation last year. The way you explained the business approach was incredible like no one can think of this kind of business.

After understanding the gist of the idea I got convinced and started the investment for my wife as well as for my son.

After all your guidance and support my 30 Lakhs investment has generated an FD Corpus of 77 Lakhs with around monthly income of 45000/- as well as a handsome amount of cash backs via credit card this would have not been possible without your planning and the keen knowledge which you have in Finance.

Once again Thanks, Rahulji for your hard work and dedication in fulfilling your client's need.

I will always recommend everyone to take an advise from Rahulji in building their Investment portfolio.

Thanks and Regards,

Yogesh Sampat Gadiya
